    Customer_id VARCHAR NOT NULL,
    ■ First_name VARCHAR,
    ■ Last_name VARCHAR,
    ■ Email VARCHAR NOT NULL,
    ■ Address_id VARCHAR NOT NULL
);

SELECT * FROM Customers;

CREATE TABLE Payments(
    Customer_id VARCHAR NOT NULL,
    ■ Amount NUMERIC,
    ■ Mode VARCHAR,
    ■ Payment_date VARCHAR
);

SELECT * FROM Payments;

--1)show the first name last name amount and payment date of customers with payment record
SELECT c.first_name, c.last_name, p.amount, p.payment_date
FROM customers c
JOIN payments p ON c.customer_id=p.customer_id;

--2)find thats customer who's paid by mobile payment and netbanking (JOIN + IN)
SELECT c.first_name, c.last_name, p.mode
FROM customers c
JOIN payments p ON c.customer_id= p.customer_id
WHERE p.mode IN ('Mobile Payment', 'Netbanking');

--3)find customers name and payment who's amount is highest than 50
SELECT c.first_name, c.last_name, p.amount
FROM customers c
JOIN payments p ON c.customer_id=p.customer_id
WHERE amount > 50;

--4)find name and payment of every customer and end with johnson
SELECT c.first_name, last_name, p.amount
FROM customers c
JOIN payments p ON c.customer_id=p.customer_id
WHERE c.last_name LIKE '%Johnson';

--5)show that customers whos payment record doesnot exist (if exists) by left join payment
tale of customer table
SELECT c.first_name, c.last_name, p.mode
FROM customers c
LEFT JOIN payments p ON c.customer_id=p.customer_id
WHERE p.customer_id IS NULL;

--6) PAYMENT table ko customer table ke right join find same result inner join and compare
both result
SELECT c.first_name, c.last_name, p.amount, p.mode
FROM Payments p
RIGHT JOIN customers c ON c.customer_id=p.customer_id;

--7) find two customers who's same payment date
SELECT p1.customer_id AS customer_1, p2.customer_id AS customer_2, p1.payment_date
FROM payments p1
JOIN payments p2
ON p1.payment_date=p2.payment_date
AND p1.customer_id<p2.customer_id;

--8) find name and payment only whose rows that amount is 30
SELECT c.first_name, c.last_name, p.mode, p.amount
FROM customers c
JOIN payments p ON c.customer_id=p.customer_id
WHERE P.amount = 30;

--9) find customers name whon payment in 2020 by credit card
SELECT c.first_name, c.last_name, p.payment_date
FROM customers c
JOIN payments p ON c.customer_id=p.customer_id
WHERE EXTRACT(YEAR FROM p.payment_date::DATE)=2020
AND p.mode = 'Credit Card';

--10) join the customers and payments tables, sort the result in descending order by amount
and display only the top 5 rows
SELECT c.first_name, c.last_name, p.amount
FROM customers c
```

```
JOIN payments p ON c.customer_id=p.customer_id  
ORDER BY p.amount DESC LIMIT 5;
```
